## Our Company Profile

Tutsan Polimer Kimya Sanayi A.Ş. was founded in 1980 in Gaziantep. Our company is one of the leading companies in Turkey in the polymer chemistry and water-based adhesive industry. Under the brands Vinaks, Vinteks, and Vinas, we offer a wide range of water-based products for the textile, carpet, furniture, paper, printing, filter, glove, and construction industries.

Operating with an annual production capacity of 43,800 tons at our modern manufacturing facility, we continuously improve quality with our strong R&D team. Thanks to over 45 years of experience, we have a strong domestic market share and continue to build a strong international brand by exporting to numerous countries. Through our international partnerships, we expand our portfolio with both domestic products and imported ones, while continuing to offer customer-focused solutions.

### Our Products for Various Industries

#### Products for the Textile Industry

Vinyl Acrylic Copolymer Latex  
Copolymer Non-Slip Base Latex  
Styrene Butadiene Latex (SBR Latex)  
Fabric Glue

#### Products for the Wood and Furniture Industry

D3 Wood Glue  
D2 Wood Glue  
Massive Parquet Glue

#### Products for the Paper, Printing, and Packaging Industry

Vinyl Acrylic Copolymer Latex  
Styrene Butadiene Latex (SBR Latex)  
Paper Glue

#### Products for Medical, Industrial, and Household Glove Industry

Styrene Butadiene Latex (SBR Latex)  
Nitrile Butadiene Rubber Latex (NBR Latex)

#### Products for the Filter and Metal Industry

Filter Glue  
Rust Preventive Glue

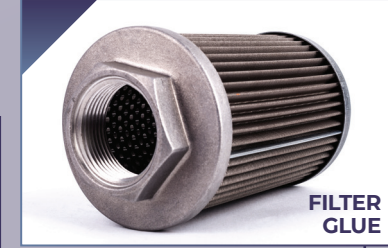

D3 and D2  
WOOD GLUE

LATEX for RUG  
and TUFTING CARPET

PVA GLUE

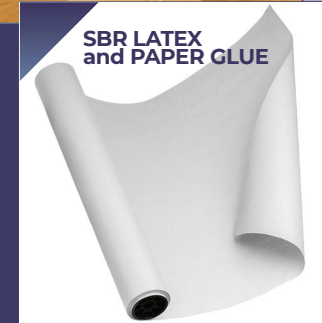

FILTER  
GLUE

SBR LATEX

MASSIVE PARQUET GLUE

SBR LATEX  
and PAPER GLUE

PAPER GLUE

NBR and SBR LATEX

Product	Type	Film Structure	Packaging	Information
Vinyl Acrylic Copolymer Latex	Copolymer	Transparent	IBC, Flexi Tank and Bulk	Water-based, multipurpose Vinyl Acrylic Copolymer Latex offering excellent adhesion and durability. It is primarily used in the textile industry for carpet backing and ensuring the connection of yarns to the base. It is also widely preferred in the paper and packaging industries. Available in various forms with different flexibility and viscosity options.
Copolymer Non-Slip Base Latex	Copolymer	Transparent	IBC, Flexi Tank and Bulk	Non-slip Base Latex is used in the textile industry to create carpet backing and secure the connection of yarns to the base. Once dried, it retains its adhesive properties, providing excellent non-slip characteristics, grip on surfaces, and flexibility. It is available in forms with different flexibility and viscosity options.
Styrene Butadiene Latex (SBR Latex)	Copolymer	Transparent	IBC, Flexi Tank and Bulk	Water-based, multipurpose SBR Latex offering excellent adhesion and durability. It is mainly used in the textile industry for carpet backing and ensuring the connection of yarns to the base. It is also commonly used in the paper, packaging, and glove industries. It comes in forms with different flexibility and viscosity options.
Nitrile Butadiene Rubber Latex (NBR Latex)	Copolymer	Transparent	IBC, Flexi Tank and Bulk	Nitrile Butadiene Rubber Latex is used to create the base structure for glove production and to provide gloves with enhanced flexibility, durability, and chemical resistance.
PVA Glue (White Glue)	Homopolymer	Transparent	IBC, Flexi Tank and Bulk	Our Vinteks, Vinas, and Vinaks branded PVA-based adhesives are specifically developed for the textile, carpet, wood, furniture, paper, printing, packaging, and filter industries. Offering high bonding strength and durability, these products have been successfully meeting industry needs for over 45 years
D3 Wood Glue	Homopolymer	Transparent	IBC and Plastic Bucket Packaging	D3 Class Wood Glue is used in the wood and furniture industries for bonding MDF, particleboard, and wooden materials, creating water-resistant and strong bonds. It is available in high and medium viscosity options and is suitable for both hot and cold press applications.
D2 Wood Glue	Homopolymer	Cloudy Transparent	IBC and Plastic Bucket Packaging	D2 Class Wood Glue is used in the wood and furniture industries for bonding MDF, particleboard, and wooden materials, providing water-resistant and strong bonds. It has the ability to fill gaps between wooden materials. This adhesive is suitable for both hot and cold press applications.
Massive Parquet Glue	Homopolymer	Cloudy Transparent	IBC and Plastic Bucket Packaging	Massive Flooring Glue is used to ensure strong adhesion during the installation of massive flooring, providing secure attachment of the massive parquet to the ground. It also offers the ability to fill gaps between the floor and the parquet.
Paper Glue	Homopolymer	Transparent	IBC and Plastic Bucket Packaging	Paper Glue, used in the paper and packaging industry, provides excellent adhesion between materials like paper, cardboard, and corrugated board. This adhesive features fast drying and is available in different viscosity options.
Filter Glue	Homopolymer	Cloudy Transparent	IBC and Plastic Bucket Packaging	Filter Glue is a heat-resistant adhesive used in the metal and filter industries. It is developed for bonding paper filter elements to metal and similar surfaces. It can be applied by spraying and offers fast drying.
Rust Preventive Glue	Homopolymer	Cloudy Transparent	IBC and Plastic Bucket Packaging	Rust Preventative Glue prevents rust formation on metal surfaces and provides strong adhesion between metal surfaces and other materials.
Fabric Glue	Copolymer	Transparent	IBC, Flexi Tank and Bulk	Fabric Glue is used for bonding fabric pieces in textile products. It offers high adhesive strength and provides long-lasting performance thanks to its flexible structure.
